**Subject:** Request for Public Comment - ERDF Leachate De-Listing Proposal -Reply

Mr. Rinne,

In response to your questions, I have sent a copy of the proposed plan for the ERDF delisting.

The delisting of the leachate will encompass the potential RCRA listed contaminants that have been and could be disposed of in ERDF, using current analyses and historical information.

The delisting will allow continued use of the leachate in the trench. EPA and Ecology granted a conditional waiver of the restriction for placement of listed hazardous liquids in a landfill pending a delisting of the leachate. If the leachate is not delisted then use in the trench will cease. The delisting will also allow for the leachate transferred through a single-walled pipe to ETF rather than the current practice of hauling the liquid by truck.

If you have any further questions or comments, please let me know.

Thank you for your interest in the proposal.

Pam Innis

EPA ERDF Project Manager
